FOOD SYSTEMS

GOAL: Support local, sustainable food systems.

2050 Vision

Anchorage will have an ecologically, socially, and economically resilient food system, where culturally-relevant and sustainably produced and sourced foods are available to everyone.

Food is responsible for **~one-quarter** of global GHG emissions.

Food waste is the world's third largest emitter, behind China (24%) and the U.S. (12%), of global GHG emissions.

Emissions from food that is never eaten accounts for **6%** of total emissions

Food production is responsible for 26% of global greenhouse gas emissions

Trying to cut back on carbon in your diet?

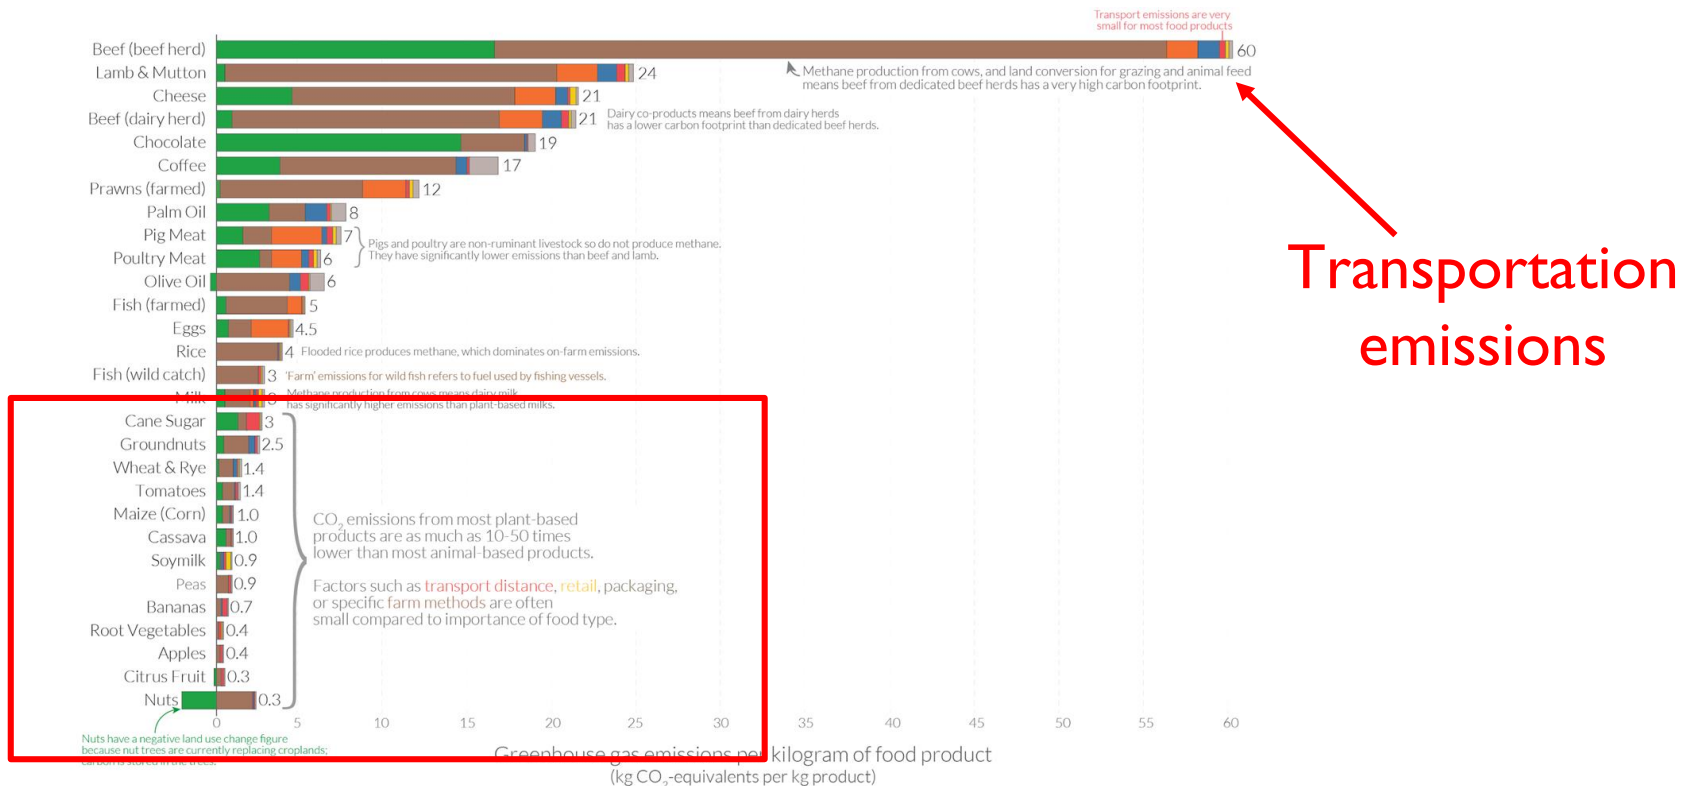

Eliminate food waste

Think about WHAT you are eating

Think about WHERE it comes from (And WHEN!)

Is it better to “eat local” to reduce my carbon footprint?

General guidelines for decreasing the carbon footprint of your diet in Anchorage (after dealing with food waste and farmed meat!)

- Avoid foods that have been transported by air
- Eat seasonally, and use preservation techniques to extend the time of year when you can eat these foods

I “eat local” to reduce my carbon footprint and...

- Learn a new skill (e.g. growing, preserving, harvesting wild foods)
- Meet my neighbors
- Understand how my food is produced
- Support the local economy
- Establish traditions in my family
- Explore Alaska!

COLLECTIVE CARE

Sitka Gathers to Feed its Families During the Pandemic

BY LIONE CLARE WITH BETHANY SONSINI GOODRICH

Throughout the second USDA Farmers to Families Food Box distribution day in Sitka, dozens of cars were backed up onto the O'Connell Bridge while folks waited patiently to get a box to help feed their families and loved ones. The moment the 10,000-plus pounds were gone and we had to start turning people away was sobering because we saw just how many families in Sitka were suffering from economic hardships and food insecurity this year. COVID-19 has impacted everyone without jobs all over supply systems and leaving people without jobs all over the world. Rural Alaska is not immune, but Alaskans know the importance of collective care. The community of Sitka compassionately stepped up to ensure that friends, neighbors, and those more in need stayed nourished.

Sitka Mutual Aid
The Sitka Mutual Aid (SMA) is a network that helps others stand in solidarity with one another by connecting requests for help with offers of support and funding. So far, SMA has coordinated the distribution of \$60,000 in direct food assistance to the community by building over 200 gift card requests, enabling local food, to distribute groceries and special foods, and working with local food resources, like Restaurant and Our Town Caters, to make free meals. Including local fish, make free meals. Including local fish, make free meals. Including local fish, make free meals.

2021 | ALASKA

Sitka Tribe of Alaska Traditional Food Harvests and Distributions
The Sitka Tribe of Alaska (STA) continued to provide an abundance of traditional foods to tribal citizens. Their harvests included 4,500 pounds of herring roe, 200 pounds of lingcod, 100 pounds of salmon, and 100 pounds of halibut. STA used the harvests to provide traditional foods to tribal citizens and those in need. Additionally, STA used some of their CARES funds to purchase local halibut and king salmon and a large freezer to meet increased demands, which also helped the local fishermen and economy. Photo by Bethany Sונים Goodrich.

Farmers to Families Food Box Distribution

ANIS and ANIB Holiday Dinners
The Alaska Native Brotherhood and Alaska Native Sisterhood hold annual holiday dinners for the community of Sitka. This year, ANIS and ANIB held a Thanksgiving dinner for the community of Sitka. The dinners could not share Thanksgiving dinner with the ANIS and ANIB but more than 600 were served. The dinners were supported by 50 volunteers and support from the City of Sitka, the Alaska Native Brotherhood, the Alaska Native Sisterhood, the Sitka Community Foundation, the Sitka Senior Society, and Sitka Mutual Aid.

AN INDUSTRY IN SUSPENDED ANIMATION

BY JENNA SCHNUR

Some restaurants have closed. Others are surviving on their owners' savings and grant money—but just barely.

It's the first week of December 2020. Alaska's COVID-19 numbers are hiring record after record. The Craigslist job listings for food, beverage, and hospitality workers in Anchorage and Fairbanks tell the tale of an industry in trouble; ad after ad seeks fast food workers or DoorDash delivery drivers. Ads for independent restaurants? For hotel food service? For pretty much anything that's not a national chain? Nonexistent. Kitchen jobs on the Slope? Okay, there are some. And the food co-op in Fairbanks needs a deli manager. So there's that.

Same goes for the rest of the state. Where there are chain restaurants, there are some job openings. Otherwise, it's an industry—from owners to bartenders, busboys, and servers—collectively holding its breath. As of October, Alaska was down 4,300 restaurant jobs from February's numbers, according to data from the National Restaurant Association. That's a 20.7 percent drop. Back in 2018, that group, in cooperation with the Alaska Cabinet, Hotel, Restaurant and Retailers Association (CHARR),

a business that part restaurant part events space, part bookstore, "the result has been a dramatic loss of revenue," says Vred Mares, the Block's operating partner. "Yeah, dramatic. I mean, 50 percent of [the revenue] we would normally be doing and that's pretty universal across the board for almost all restaurants."

Mares says that, to some degree, The Writer's Block team has been lucky as she's been able to devote a good deal of her time to going after grant money. "Wherever it is, whether through the SBA or PPP, or AK Cares or the Municipality or the hospitality industry, whatever it is, I had made it my job to be on top of it. Not every business had that ability, not every business gets approved."

She says the grant money is "the only reason that we will continue to be open for the near term, and I can't speak midterm or long term but for the near term." An additional challenge? The constant changes in mandates that have forced restaurants to quickly shift how they do business. It's been a little of this, a little of that. Local governments around the state have bounced back and forth with mask mandates, as well as calls for restaurants and bars to limit capacity or close indoor dining. With restaurant profit margins always notoriously low, keeping up with the ongoing changes has been hard for restaurant owners to stomach and endure.

FOOD JUSTICE AND SOVEREIGNTY

Cultivating Equity and Choice

BY ROBBIE MIXON

Editors' note: we welcome Robbie Mixon, Executive Director of the Alaska Food Policy Council, to our pages with an introduction to food justice and food sovereignty. If you would like to learn more about the work of

first global forum on food sovereignty in Mali in 2007, food sovereignty has its roots in labor organizing and is, at its core, the right of all people to have healthy, culturally appropriate food, and the right

IAC'S TECHNICAL ASSISTANCE PROGRAM

Through collaboration between the U.S. Department of Agriculture Office of Tribal Relations and the Intertribal Agriculture Council, the Technical Assistance Centers were established in order to increase access and use of USDA programs and services by Indian producers and Tribes. By working to streamline existing programs and assisting producers with the application process, our goal is to build a more functional relationship between the USDA and Indian Country and play a role in the evolution of those programs over time.

REGIONS

Click on your location to view your region information

The diversity of Alaska's food system creates an incredible opportunity to pursue creative solutions that can be successful in multiple ways. By combining traditional foods and the associated ecological knowledge with traditional western approaches to agriculture there is a unique opportunity to create local and regional economic stimulus, increase diversity and quality of food available, and address concerns that may exist about food security.

Spring Classes Sampler...

Tuesday, March 30

- 9:00am - Produce Safety Alliance Grower Training begins (2-Day)
- 9:00am - AgrAbility Workshop: Working with Service Connected Disabled Veterans
- 12:00pm - Composting: one part of your personal sustainable lifestyle
- 6:00pm - Diabetes Prevention Program - Sitka District (year-long)
- 6:00pm - Extending the Growing Season with Sustainable Heat

Wednesday, March 31

- 12:00pm - Diabetes Prevention Program Mat-Su District (year-long)
- 2:15pm - Walkabout Wednesday w Ann & Jodie (Live gardening Q&A, weekly)

Thursday, April 1

- 12:00pm - Spring Clean with Green Products
- 6:00pm - Diabetes Prevention Program - Fairbanks District (year-long)

Saturday, April 3

- 1:00pm - Preserving Alaska's Bounty course begins (7 weeks)

Tuesday, April 6

- 9:00am - Pesticide Safety Education Program (2-day)
- 12:00pm - Soils: How better to celebrate Earth day than to learn about earth?!!
- 6:00pm - Growing with Extension: Gardening in SE Alaska (4 weeks)

Wednesday, April 7

- 12:00pm - In the Virtual Garden: Spice Up Your Garden (Herb Gardens)

Monday, April 12

- 8:00am - Certified Food Protection Manager Training & Exams

Wednesday, April 21

- 9:00am - Produce Safety Alliance Grower Training (2-day)
- 12:00pm - In the Virtual Garden: Pollinator Gardens

AgAlaska, Alaska Village Initiatives - RONALDA ANGASAN

AVI promotes a *vision of social equity and environmental well-being tied to food security in the Alaska Arctic region.*

AVI and the Knik Tribe are working towards developing a harsh climate, year-round, modular web-based monitored greenhouse. The project spans three years allowing for continued expansion and testing of hydroponics, raised beds, and vertical farming. The project serves as the potential foundation of transplanting the appropriate technology to remote Alaska villages as an advanced tool in the battle against food insecurity in Alaska's villages.
