

# RENEWABLE ENERGY LEGISLATION IN ALASKA

## Alaska's Legislature could build a sustainable future

This legislation can create infrastructure that will increase the amount of renewable energy sources within Alaska and create a healthy and reliable future.

### Renewable Portfolio Standard

House Energy Committee

### Renewables in Alaska

- Measurable increases to renewable energy
  - 25% by Dec. 31, 2027
  - 55% by Dec. 31, 2035
  - 80% by Dec. 31, 2040

### Community Solar

Labor and Commerce Committee

#### Community Solar for Everyone

- Allows everyone, including renters and low income individuals to take advantage of solar power
- Part of solar gardens, like a solar field but owned by a community

### Renewable Energy Fund

Current Law

#### Investing in Alaska's Renewable Future

- The REF provides grants for renewable energy to be installed for
  - Heating Projects
  - Renewable Electric Projects
- Managed through the Alaska Energy Authority

### Greenbank

Senate Finance Committee

#### Energy Independence in Alaska

- Loans can be issued to increase amount of renewable energy projects statewide, for both public and private
- Can be used to increase the amount of heating pumps and electric vehicle charging stations
- The Green Bank could be run by Alaska Housing Finance Corporation
